Waller County EMS Equipment and Supply List

Medical Director Approval / Signature Page

As Available Definition=

Equipment listed "as available" means the equipment would only be found on a frontline ambulance, or if the equipment is out of service, other options providing a similar function will be available. For example, if a LUCAS device is out of service then manual CPR can still be performed.

Currently frontline ambulances would be Medics 1, 2, 3, 4, 5, 6 and 8.

****LUCAS**

Should a LUCAS become unusable, it will take 24-72 hours for a replacement to arrive. Crews will have to do manual CPR until a replacement is received. No spare LUCAS is available within the organization.
